

AO Trauma Seminar— Managing Pediatric Fractures

November 19–20, 2026 Sofia, Bulgaria

Description

The AO Trauma Seminar – Managing Pediatric Fractures provides advanced, clinically focused training on the management of musculoskeletal injuries in children and adolescents. Led by expert faculty, the seminar covers modern principles of fracture care, special trauma situations, and selected orthopedic conditions through interactive discussions and case-based learning.

Target participants

This seminar is targeted at traumatologists, orthopaedic surgeons, paediatric surgeons and other surgeons who are actively engaged in paediatric fracture care and who want to enhance their level of expertise in the field of paediatric trauma/orthopaedics management.

Faculty

V. Aleksiev (Bulgaria), A. Clarke (United Kingdom), G. Dimitrov (Bulgaria), Z. Drenchev (Bulgaria), D. Enchev (Bulgaria), R. Kehayov (Bulgaria), M. Rashkov (Bulgaria), A. Semenistyy (Bulgaria), B. Tasev (Bulgaria), A. Turgut (Turkey), B. Valentinov (Bulgaria).

Objectives

At the end of this seminar, participants will be able to:

- Recognize the difference of bone healing in children and adolescents compared to adults, and describe how this affects paediatric fracture management
- Evaluate a range of nonoperative and surgical options for the treatment of common paediatric fractures
- Manage paediatric fractures according to biological and mechanical principles, and apply appropriate techniques and technologies
- Apply treatment strategies for paediatric fractures based on available evidence
- Develop strategies for the prevention and management of complications associated with paediatric fractures
